BRILLIANT LIGHTING SOLUTIONS LOOK LIKE THIS

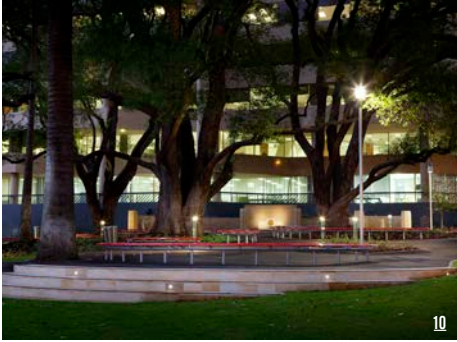

Welcome to Living Showroom, a sample of our commissioned lighting installations to help give a true sense of the potential of our products, which can be hard to gauge in a showroom alone.

We hope you enjoy experiencing these examples of superb light in action. Think of the joy and thrill of Christmas lights but with the added bonus of sheer aesthetic brilliance!

Lighting solutions are intended to add depth and dimension, light and shade, scale and drama, or safety and confidence to the spaces they illuminate. While viewing lighting solutions in a showroom provides an opportunity to admire a range of lighting alternatives, the imagination can only stretch so far. That's why we've featured some of these applications in practice to give you a taste of the excellence in design and execution that we are renowned for at Monduluce.

FEATURE PROJECT CLIFF LIGHTING AT ARTHUR HEAD, FREMANTLE

CLIENT

City of Fremantle

LIGHTING DESIGN

KLD - Klaasen Lighting
Design, Martin Klaasen

LIGHTING INSTALLATION

High Speed Electrics

LOCATION

Arthur Head Reserve
Fremantle WA 6160

PHOTOGRAPHY

Ron Tan

The **City of Fremantle** engaged with the local community for ideas on how to best bolster community activities and give the City a dynamic, exuberant vibe. One suggestion, to light up the historical cliffs at the base of the Roundhouse, was met with resounding enthusiasm. The cliffs have a tunnel that links the beach with the city, and has a rich cultural history in the fishing industry dating back to the 1800s. Bathers Beach, to its south, is home to a popular sunset market every Saturday in the summer months, which attracts thousands of eager visitors. Lighting the rocky limestone cliff and Roundhouse area that form the backdrop to the market was instantly recognised as an excellent plan, both from an aesthetic and practical point of view, and the perfect complement to the precinct's reputation as an artistic mecca.

LIGHTING PLAN

KLD received a request from the City of Fremantle to examine the best way to light up the Roundhouse area, developing an overall lighting master plan complete with various options, stages, implementation steps and budget implications. One key consideration was the desire to conceal the light as much as possible to allow the texture of the beautiful limestone rocks to truly shine. Using our iGuzzini Linealuce RGB LED colour technology, we sampled a series of stunning colours during testing that resulted in some extraordinary visuals. The public embraced the end result wholeheartedly with many voicing support for more of the same in the future.

Ron Tan

The **Town of Vincent** sought feedback from residents, businesses, café crawlers and Leederville lovers to formulate a plan to revitalise Leederville. A talented team was given the mission to transform the Leederville Town Centre Oxford Street Reserve into a contemporary urban park that embodied all of Leederville's character and charm. This project was the cornerstone of the Leederville Town Centre invigoration and aimed to provide a welcoming ambiance to visitors of the precinct.

LIGHTING PLAN

The project consisted of new public seating areas, a feature playground and urban play equipment, therefore the lighting design kept a strong focus on aesthetics, durability and safety. Wood & Grieve Engineers worked closely with our team to implement the iGuzzini Crown and Lun-up, which complied with relevant standards for safe movement while also creating an inviting atmosphere for the community to enjoy.

ELECTRICAL ENGINEER

Sage Consulting Engineers

ELECTRICAL CONTRACTOR

Gilmore Electrical

LOCATION

**Rokeby Road,
Subiaco WA 6008**

PHOTOGRAPHY

Ron Tan

Committed to the revitalisation of the Subiaco Town Centre, the **City of Subiaco** is embracing opportunities to increase vibrancy in the area. Rokeby Road's streetscape upgrade is a perfect example, with the project aiming to improve the amenities, safety and overall aesthetics of the precinct. Main objectives of the upgrade included improving the median strip, addressing hazard concerns of exposed tree root structures, protecting trees, upgrading aged infrastructure, creating a pedestrian friendly environment and improving lighting in the area.

The Rokeby Road streetscape upgrade is forecast to host a variety of dynamic activities in the future, such as markets, outdoor concerts, exhibitions and other community events.

LIGHTING PLAN:

We suggested the iGuzzini Archilede, which was endorsed by the City's landscape architects, Blackwell and Associates, and lighting engineers, Sage Consulting Engineers, due to its high performance optical system. This exciting product has the ability to create an extraordinary aesthetic effect by extending light under the shop awnings to deliver light onto the faces of the pedestrians, and is the ideal LED solution for these improvements.

Baldvis WA 6171

PHOTOGRAPHY

Ron Tan

The **City of Rockingham's**, Mary Davies Library and Community Centre in Baldvis is a benchmark in community facilities, providing visitors with an inspiring experience for all the senses. The Centre blurs the lines between indoors and outdoors, tradition and technology. The building seamlessly integrates with nature and combines intimate restrained retreats and large expressive spaces in the best possible way.

LIGHTING PLAN

A key feature of the design concept is the structural trees and uninterrupted timber ceilings or 'canopies'. The design, coupled with our light fittings, achieve the vision of a clean, services-free ceiling by using the iGuzzini Le Perroquet projector up-lights to indirectly illuminate the large open space. Set equally around each structural tree column, these expressive light fittings form an integral part of the design. All light fittings are easily accessible for servicing, even with ceiling heights of up to nine metres. This design successfully reflects the vitality and growth of this local community whilst honouring Baldvis' rural heritage.

FEATURE ARCHITECTURAL DESIGN AND PLANNING

AECOM Australia Pty Ltd

ELECTRICAL ENGINEER

AECOM Australia Pty Ltd

LIGHTING DESIGN

Mervin van der Linde

LOCATION

**99 St Georges Terrace,
Perth WA 6000**

PHOTOGRAPHY

Ron Tan

The **Town of Claremont** engaged AECOM to prepare the detailed design and documentation of a revamped Bay View Terrace between Gugerri Street and Stirling Highway. The project encompassed the creation of a shared road/pedestrian-friendly street and included tree planting, alfresco dining and zones to accommodate various events and social activities.

LIGHTING PLAN

iGuzzini Argo Span-Wire was chosen for the road lighting complemented by CREE Edge (round) for the pedestrian lighting. These fittings substantially reduce operating costs for the council as well as carbon-use impact on the environment. AECOM was further engaged to develop, design and document for the construction of a series of feature architectural elements throughout the street to contribute to the unique identity of the new space. The main feature showcased programmable interactive lighting and misting elements to intrigue, inspire and connect with visitors, and leave them with a positive, long lasting impression of the area.

The **City of Perth's** Supreme Court Gardens are expansive grounds incorporating Stirling Gardens and Government House Gardens, the original Swan River wall, the Francis Burt Library and the Supreme Court buildings. As a prominent tourist attraction in Perth, it's essential that the space provide facilities like seating, public toilets, drinking water and lighting to meet the needs of visitors.

LIGHTING PLAN

We proposed iGuzzini Lavinia, an LED street luminaire with high performance optics that creates little to no light pollution. The addition of pathway lighting served a dual purpose of creating a safely lit area and highlighting the stunning landscaped gardens after dark. The updated lighting makes the Supreme Court Gardens even more inviting for popular events such as 'Opera in the Park' and 'Carols by Candlelight'.

AT MONDOLUCE, OUR PASSION FOR LIGHT SHINES THROUGH OUR QUALITY SERVICE AND PRODUCTS.

Our vision at Mondoluce is to provide unsurpassed quality, reliability and value to our clients by offering superior products and expert service. Our goal is twofold – to be the best lighting provider in the market, and to provide the best experience and outcome for our clients. We want to work with you to create the finest aesthetic, creative, innovative, sustainable and functional lighting solution for your business.

PEOPLE

People matter at Mondoluce. It's our people who grow our business and determine both its success and the ultimate satisfaction of our clients. We don't simply train our people, we develop and nurture them so they can reach their full potential. This development is not just in the key areas of product and application knowledge, but across a range of facets that contribute to a fulfilling career path.

SERVICES

We strive to be the industry benchmark by offering outstanding support to our clients across the entire spectrum of our services, as well as products that are at the forefront of global design, innovation and manufacture. When a design or architectural solution is required, form becomes a key factor in our decision-making. When a commercial solution is called for, we seek to provide functional solutions that meet or exceed the requirements of our client. Our focus is generating solutions that match form and function, without compromise.

LIGHTING APPLICATION AND DESIGN - FROM SPECIFICATION TO INSTALLATION

Our number one priority is to establish and nurture positive working relationships with the design, building and construction industry. We want to be your trusted lighting partner and advisor from **specification to installation** - whether that means from the concept and design stage at the inception of a project or providing alternative solutions midway through. We strive to work with your budget to achieve the best outcome. Here at Mondoluce, we pride ourselves on offering value added lighting options that respect and adheres to the existing plan when approached at the construction and supply stage, so the project is never compromised and is completed to its full potential. We consider our collaborative, interactive and flexible approach to a project to be of the highest standard of service in our industry.

DIVERSITY

Lighting plays a vital role in bringing aesthetic beauty or strategic functionality to a space. It adds depth and dimension, light and shade, and safety and confidence to workplaces, public areas and entertainment venues. Together with Metalight and Mialuce, we are passionate about the diverse role that lighting plays. We look forward to providing you with highly functional and aesthetically brilliant solutions across a range of architectural, commercial, industrial and mining applications.
